GP CPD Education Dinner

Screening, Diagnosis, Treatment and Surgical Management – an update for GPs.

When: Wednesday 16 May, 6–9pm

Where: Victoria Park Golf Club, 309 Herston Rd, Brisbane City QLD 4006

The Unitingcare Medical Imaging GP Education Seminar Series aims to assist in improved patient outcomes by providing GPs with relevant, current and evidence based education and information. 1 in 8 women will be diagnosed with breast cancer before age 85 years and 90% have a chance of surviving 5 years from diagnosis.

The incidence of breast cancer in Australia is increasing and by 2020, it is estimated that there will be 17,210 new cases of breast cancer diagnosed in women or approximately 47 every day. GPs are often the first point of contact for someone with a breast symptom.

Facilitator

Dr Michael Gillman

Dr Gillman has over 20 years experience as a medical practitioner. With specific expertise in mens health, he sits on numerous Australian national health related advisory boards and delivers presentations to medical and community groups around Australia.

He has been an invited speaker to several international medical conferences and is regularly interviewed by media outlets. Until recently he was involved in talk-back radio segments with the ABC. After receiving a post graduate certificate in Lifestyle Medicine from the Southern Cross University, he co-authored a chapter in the medical textbook "Lifestyle Medicine" published by McGraw-Hill.

Seminar program

6.00pm	Registration and Drinks	
6.30pm	Welcome and Introduction	Dr Michael Gillman
6.45pm	Breast Imaging Diagnosis: 3D Mammography and MRI	Dr Patty Connor – Specialist Breast Radiologist
7.15pm	Main Meal	
7.30pm	Surgical Management and Reconstruction	Dr Ben Green – Breast and Endocrine Surgeon
8.00pm	Developments in Radiation in Management of Breast Cancer	Dr Nicola Lowrey – Radiation Oncologist
8.30pm	Systemic Therapy for Breast Cancer and Recent Developments	Dr Haamid Jan – Medical Oncologist
9.00pm	Close	

Learning outcomes

- Understand the differences in modalities for breast imaging diagnosis
- Explain the latest treatment options for breast cancer
- Understand factors that may influence the choice of treatment
- Recognise support available for breast cancer patients in a multi-disciplinary environment

This activity has been approved by the RACGP QI&CPD Program. Total 4 Category 2 points. Activity Number –122664

Seminar speakers

Dr Patty Conner

A UQ medical student graduate, Dr Connor completed her radiology training at Royal North Shore Hospital in Sydney. She went on to undertake fellowships in breast imaging at RNSH's breast screening and paediatric radiology at the Children's Hospital in Westmead. Dr Connor also holds a special interest in MSK, particularly hand and wrist, and oncology.

Dr Ben Green

Dr Green is a Breast and Endocrine Surgeon who operates and consults at St Andrew's War Memorial Hospital. He completed his fellowship subspecialist training in Breast and Endocrine Surgery in 2012 and has a keen interest in breast cancer research and is currently leading a prospective research study in Breast Cancer Molecular Genetics, investigating potential biomarkers to predict and identify early disease recurrence.

Dr Nicola Lowrey

Dr Lowrey has been a consultant Radiation Oncologist with Genesis CancerCare since 2016, following completion of a twelve month clinical research fellowship in the field of breast cancer, at the Princess Margaret Cancer Centre in Toronto, Canada. Here she gained extensive experience in the use of Deep Inspiration Breath Hold technique, hypofractionated radiotherapy and locally advanced breast cancer, and investigated the use of breast MRI to improve the accuracy of radiotherapy planning. Nicola treats all areas of general oncology but sub-specialises in the management of breast, gynaecological, skin and central nervous system tumours.

Dr Haamid Jan

Dr Jan is a Medical Oncologist with ICON Cancer Care. His particular areas of interest include breast cancer, lung cancer, gastrointestinal cancers and melanoma particularly the novel immunotherapies and targeted therapies that have revolutionised and transformed the landscape of cancer in general and of metastatic disease.

Registration options

By phone: 07 3371 9588

By email: jeastgate@ucmi.com.au (please include full name, QI&CPD number, practice address, phone number, dietary requirements)

By fax: 07 3871 1249 (please complete all details below and fax back)

RSVP: Wednesday 9 May

If you are unable to attend please email jeastgate@ucmi.com.au to request seminar content which will be sent to you post event.

Please provide all details below:

Given name: _____ Last name: _____

RACGP QI&CPD Number: _____ Provider Number: _____

Practice Name: _____

Practice Address: _____

Suburb: _____ State: _____ Postcode: _____

Phone: _____ Email Address: _____

Dietary Requirements: _____
